

Azoxy dyes and copper complexes thereof

Abstract

5

Azoxy dyes of the general formula I in the form of the free acid

where

20

n is 0 or 1, each

R- is selected from the group consisting of methoxy, hydroxyl and carboxyl, each

25

R² is selected from the group consisting of carboxyl, amino, C₁-C₄-alkylamino, allylamino, benzylamino and methoxycarbonylmethylamino, and the phenyl rings A may additionally be substituted by C₁-C₈-alkyl, unsubstituted or methyl- or halogen-substituted phenyl, hydroxyl, amino, nitro, halogen, carboxyl, N-benzylcarbamoil, unsubstituted or

30 nitro-, halogen-, C₁-C₄-alkoxy- or acetoxy-substituted phenylcarbamoil and naphthylcarbamoil or be benzofused,

their copper complexes, a process for preparing the copper complex dyes, azoxy dyes of the formula I in their partially or completely deacylated form, their copper complexes, colorants comprising these azoxy dyes and/or their copper complexes and also their use for dyeing and printing natural or synthetic substrates.
